Sakinaka Mumbai

SUMMARY

Aspiring Java Developer with hands-on experience in building scalable web applications using Spring Boot, MySQL, and Hibernate. Skilled in developing RESTful APIs, database design, and solving real-world problems with clean, efficient Java code. Passionate about backend development and delivering innovative solutions.

PROJECTS

Hospital Management

12/2024 - 03/2025 Sakinaka

Developed a full-stack Hospital Management System to streamline patient registration, doctor scheduling, appointment booking, and billing. Implemented RESTful APIs using Servlet & JSP and managed relational data using JDBC with a MySQL database. Focused on backend architecture, authentication, and role-based access (Admin, Doctor, Patient) to ensure secure and efficient operations.

- Designed the system with a focus on real-world hospital workflows, improving efficiency in patient handling and reducing manual errors through automation of routine tasks.

Quiz-Application

03/2025 Sakinaka

Built a dynamic Quiz Application that allows users to take timed quizzes, track scores, and review results. Designed with a modular backend using Servlet & JSP and persisted quiz data using MySQL. Focused on performance, user authentication, and integration to ensure a smooth and secure user experience.

- Enabled users to review correct answers after quiz submission for better learning and feedback.
